

Artūrs Reiljans

Riga, Latvia ernt@ernt.lv (+371) 2-96-901-96 <https://ernt.lv>

I enjoy creating useful Internet projects, both as work and as a hobby

What I'm good at

PHP

- Well-versed in [Symfony](#):
 - First met on an existing e-commerce platform at [Intexsys](#), used later for replacing legacy email subscription management system with a shiny new one.
 - Started a new service for retrieving road closures data from various APIs at [Mappost](#).
 - My pet project, [Zurbu v2](#), runs on Symfony as well.
- Worked extensively with [Laravel](#):
 - At [Printify](#),
 - ... and [PATA](#)—using [Livewire](#) for a [progressive web app](#),
 - ... and [Tilt](#)—using [Lighthouse](#) for [GraphQL](#).
- Used [Zend Framework](#) at [Mogo](#), and [Slim Framework](#) at [Car Rental Gateway](#).
- Reinvented the wheel by creating own framework in my early years for [Zurbu v1](#). Who didn't?
- Wrote a standalone internal publish-subscribe library with plugins for [Laravel](#) and [Yii2](#) at [Printful](#)—including adapters for [Protobuf](#) serialization and [RabbitMQ](#) queues.

Databases and message queues

[PostgreSQL](#) [MySQL](#) [ElasticSearch](#) [Redis](#) [MongoDB](#) [SQLite](#) [RabbitMQ](#) ...

Infrastructure

[Docker](#) [Terraform](#) [Kubernetes](#) [Ansible](#) [Bitbucket Pipelines](#) [GitHub Actions](#) ...

Maintaining some interest in front-end, too

- [HTML](#) and [CSS](#)—often happy to see new features get more green boxes at [caniuse.com](#).
- [JavaScript](#)—less of an expert here but still able to do a thing or two.

Stepping out of a comfort zone

- Used [Node.js](#) for a new microservice at [Car Rental Gateway](#).
- Played around with [Go](#) for [Zurbu](#).
- Wrote some [Java](#) code using [Spring Framework](#) for a legacy microservice at [Printify](#).
- Created a very basic but useful [Android](#) app for [Zurbu](#).

Communication

- Migrated existing [Mappost](#) codebase from SVN to Git—few simple commands, lots of explaining, introducing [Gitflow](#)-based processes, mentoring, and other [people skills](#).
- [IT Micro](#) was a small company with lots of integrations. 10 countries, 33 mobile carriers, 10 languages, 19 APIs used for carrier lookups, WAP billing, SMS sending and receiving—apart from technical flexibility, this also required constant [external communication](#).
- [Agile](#), [Scrum](#). Captain Obvious asked me to write this line.
- As a company owner, I am able to work on [B2B contracts](#).

Languages

- I am fluent in [English](#), [Russian](#) and [Latvian](#).
- Able to read, write basic texts and hold everyday conversations in [German](#).
- Generally curious about unfamiliar ones. Once even implemented an API integration using documentation in Romanian at [Mogo](#).

Where I learnt it

	Jobs	Personal projects	Education
	All of them as a back-end developer in Riga, Latvia, unless noted otherwise	An urban-themed play in four acts	Made my first steps in IT at school and Progmeistars, self-taught afterward
2026	<u>Mogo</u>	<u>Zurbu v2</u>	
2025	A loan ERP system	A platform for thematic projects with an emphasis on geography	
	<u>Tilt</u>	My primary technical playground	
2024	A transportation management system	Includes data migrated from the first version	
	<u>PATA</u>		
	A manufacturing ERP		
2023	<u>Car Rental Gateway</u>		
	Tartu, Estonia (hybrid)		
	A car rental aggregator		
	<u>Printful</u>		
	A print on demand system		
	<u>Mappost</u>		
	A task planning and route optimization system		
	<u>Printify</u>		
	A print on demand system		
2018	<u>Mogo</u>		
	A loan ERP system		
	<u>Intexsys</u>		
	A multi-website US-based e-commerce platform		
2013		<u>Zurbu</u>	
	<u>IT Micro</u>	A moonshot at creating a platform for local history blogs and forums worldwide	
	SMS-based quiz and chat games and lotteries		
2008	<u>True Vision</u>		<u>University of Latvia</u>
	front-end		History
	Corporate websites, online stores		<u>University of Latvia</u>
			Law
	<u>freelance</u>	<u>"Riga. History and Sights"</u>	<u>Riga Secondary School №40</u>
	front-end, SEO	A school project on octocentenary of Riga that evolved into a popular history blog, gallery of old maps, and a forum	
2003			<u>Progmeistars</u>
			Pascal, basics of programming
1996
